Caleb Vasquez

Saint Paul, MN · caleb.vasquez@example.com · (651) 555-0168 · linkedin.com/in/example-caleb-vasquez

My Key Qualifications

- Front-end experience at a regional healthcare organization: **built 18 responsive provider and clinic pages** in HTML, CSS, JavaScript, and React, cutting average build time from 2.5 to 1.5 hours.
- **Resolved 27 WCAG issues** on appointment and location pages through semantic HTML, heading structure, keyboard navigation, and form label fixes.
- Helped integrate a **REST API** for provider and location listings, reducing manual content update steps from 4 per page to 1, with responses tested across Chrome, Safari, Edge, and Firefox.
- WordPress across two settings: content updates at HealthPartners and a nonprofit site where **Lighthouse mobile SEO improved from 68 to 89**.

Experience

Junior Web Developer — **HealthPartners**, nonprofit integrated healthcare provider and health plan

Nov 2025 – Present · 1 yr

- Built 18 responsive provider and clinic pages for service-line updates using HTML, CSS, JavaScript, and React, cutting average page build time from 2.5 hours to 1.5 hours by reusing React-based page sections and standardized CSS patterns built from Figma designs.
- Assisted with a REST API integration for provider and location listings, connecting React components to API data and cutting manual content update steps from 4 per page to 1, with responses tested across Chrome, Safari, Edge, and Firefox.
- Improved accessibility on appointment and location pages by resolving 27 issues flagged in internal WCAG reviews, updating semantic HTML, heading structure, keyboard navigation, and form labels.
- Support WordPress content updates and troubleshoot cross-browser layout and performance issues alongside senior developers and designers.

Education

- **University of Minnesota** — Bachelor of Science in Computer Science · 2021 – 2025 · Relevant coursework: Web Programming, Human-Computer Interaction, Database Systems, Software Engineering

Projects

- **Clinic Scheduling Capstone**
  Built a React web app for a campus health service simulation that displayed appointment slots and provider data from REST APIs. Reduced average scheduling task time by 32% in usability testing with 25 student users.
  Tech: React, JavaScript, REST APIs, CSS3

Sample resume made with Specific Resume · specificresume.com

- **Community Resource WordPress Site**
  Created and maintained a WordPress website for a local nonprofit program, including mobile layouts and on-page SEO updates. Improved Lighthouse mobile SEO score from 68 to 89.
  Tech: WordPress, HTML5, CSS3, Google Analytics 4

Skills
